

# Pick Up Line Sign

## Mounting Instructions

**Package Includes: (1) Clear Holder, (2) Ball Chains, (1) Perforated Paper**  
**Items needed to install: Household Scissors or Metal Jewelry Cutters**

1. Disengage sun visor from locked position.
2. Face the front of the Pick Up Line Sign (child's name) towards the front windshield of the car.
3. Place one ball chain around the sun visor and roll across to the right, then hook the next ball chain and roll across. Both chains should be hanging at this point.
4. Lock the sun visor back into the roof clamp.
5. Unhook (pinch) one side of the ball chain connectors and adjust length to the size of your sun visor.  
  
Note: Both sides of your visor might not be the same size so measure each separately. The top of the Pick Up Line Sign should hang about 1/4" from the bottom of the sun visor so that it will swing freely and be able to fold up to store. Make sure to test the drop down and fold up before clipping off excess ball chain.
6. Cut off excess ball chain (cut between metal balls) It's always a good idea to make it a little longer the first cut.
7. Reconnect the ball chain to the connector.
8. Repeat step 6.
9. Make any adjustments once both sides have been measured and clipped.
10. You can manually write your child's name on the perforated paper provided or print it on your computer. Tear where perforated then slide the paper into the sign holder so that the name faces towards the windshield. There are two perforated signs per sheet of paper.
